

HIGH LOW CIRCLE SKIRT PATTERN

Easy DIY High Low Circle Skirt Pattern Tutorial | Step-by-Step Guide

Welcome to Lingels Fashion Designs! Today, we're excited to share a simple and beginner-friendly tutorial on creating your own high low circle skirt pattern. Follow along as we guide you through each step, ensuring a stylish and trendy outcome.

Step 1: Folding the Pattern Paper

To start, take your pattern paper and fold it twice. This will create four sections, allowing us to efficiently draft our skirt pattern.

Step 2: Marking the Waist Radius

Calculate your waist circumference and divide it by six to determine the radius. For example, if your waist is 30 inches, your radius will be 5 inches. Using a measuring tape, mark this radius on the folded paper and connect the dots to form the waistline.

Calculate waist radius

Mark the radius

Connect the dots with curved ruler

A Waistline is formed from connected dots

Step 3: Determining the Skirt Length

Decide on the desired length for the back of your skirt. Rotate the measuring tape around the waistline, marking the length accordingly by connecting the points to outline the skirt shape.

Determine full skirt length

Join marked points with curved ruler

Step 4: Cutting the Pattern

Carefully cut along the marked lines with scissors. When unfolded, you'll see the circular shape of your skirt pattern taking form.

Step 5: Identifying the Front and Back

Label one half of the circle as the back and the other half as the front. This will help you differentiate between the two when sewing the skirt.

Unfold the cut and open to identify back and front The fold showing one part marked Back

Step 6: Creating the High Low Effect

For the high low effect, trim the front of the skirt shorter than the back. Measure one inch down from the center front and mark it. From there, measure outwards to create an even line on both sides. Use scissors to trim along the marked line, gradually angling downwards to achieve the desired effect.

Cut from 1-inch mark (position of left thumb) Desired shape achieved after the cutting

Step 7: Finishing Touches

Once you're satisfied with the length difference between the front and back, your high low circle skirt pattern is complete and ready to use! Feel free to customize it further to suit your style preferences.
